Testimonials

"I commend CCT Africa for its pivotal role in gathering thought leaders from across Africa to engage in dynamic conversations with actionable follow-ups. By focusing on the transformative potential of Cloud, Content and Telecommunications, we are advocating effectively for a forward-thinking Africa."

Marisa Trisolino, CEO, CMC NETWORKS

"Attending CCT Africa 2024 provided an invaluable opportunity for executive leaders from the CCT ecosystem across Africa to openly discuss the challenges that are impacting on the development of pan-Africa connectivity and network infrastructure and actually work towards solutions. Tangible action points were created to impact change and enable Africa's future generations. The summit is a hugely important event in the calendar for executive leaders operating within Africa's CCT ecosystem."

Andile Ngcaba, Chairman, CONVERGENCE PARTNERS

"CCT Africa 2024 brought together many of the executive leaders from across Africa and some of their partners across the world. The content quality as well as the opportunity to learn from and spend time with leaders in the digital ecosystem makes this a highly worthwhile, productive and unique summit and allows many of the key players across the continent to have tangible discussions on how to partner and collaborate to enhance connectivity and increase critically needed digital infrastructure across Africa."

Lanre Kolade, Chairman, CONNECTEDCOMPUTE

"CCT Africa 2024 provided an intimate setting in Mauritius for a closed group of like-minded individuals to gather and have meaningful conversations. The conference created an ideal environment where I was able to meet with potential investors, content providers, other mobile network operators, and wholesalers—all within the span of two days. It was a highly productive experience that facilitated valuable connections and opportunities."

Farouk Ramji, CEO, Mawingu

"CCT Africa 2024 was a remarkable event that successfully brought together leading minds from the cloud, content, and telecoms sectors across Africa with facilitated discussions on the strategic challenges and opportunities that will shape the future of connectivity and digital infrastructure on the continent. The platform has inadvertently fostered a shared understanding of the critical issues affecting our industry. The event's focus on partnership, open dialogue, collaboration and innovation is something I believe is essential for addressing Africa's evolving digital needs, and it has laid the groundwork for actionable solutions that can drive sustainable growth in the connectivity ecosystem, and unlock the full potential of Africa's digital future."

Stanley Jegede, Chairman, PHASE 3 TELECOM

"One of the most well executed and effective summits I have been to."

Charly Bahous, CEO, TOUCHNET TELECOMMUNICATIONS (PTY) LTD
